Dear Harold,

I have to stop reading for a few minutes--my eyes can't take it.

Enclosed are copies of reports on Garrett. They are short but not too sweet. What it amounts to is that a guy who is Nazi in viewpoint watched his mail prior to the 20th and then suddenly left Laredo. His wife claimed on the 23rd that he was in Mexico, but Mexican repords seem to refute that. The FBI seems to make no attempt to re-interview, despite the indications that he couldn't have been in Mexico. The next two reports indicate that he died of a heart attack. This is incredibly suspicious. I have written Penn about it and said that I would ask you to send him copies of the BBI reports. We are out of copying paper here and I don't know whether we will have some more in 2 hrs. or 2 weeks, since our old copier will not be in use too much longer if at all. We are getting a xerox which I won't be able to use.

Second item is pg.11 from CD1485 which indicates that the prints on the Hands Off Cuba leaflet from the Dumain St. Warf were not LHO's. You undoubtedly have this entire report, so I only sent this one page.

The final is the OXnard-Nier report about an Oswald in Mexico. Sorry about all the poor copies, but most of the problem is that the Archives sent me things so light that they look like blank pages from a few feet away. Yours are as good as mine.

Interest in Continental Oil Co. is increasing. Asked Penn about this (in Houston) and also current address of Fowler. Take care and best of luck. Show this stuff to Vince if you get a chance.

Gary
